

Hotel Series Safes

Digit Plus *Memory* Digit Plus

Digit Plus and Digit Plus Memory:

Common features of Digit Plus and Digit Plus Memory

Laptop size capacity

The size is designed to accommodate comfortably a laptop PC and other belongings.

Display

Shows all basic user information in a simple and intuitive manner.

Beeper

In combination with the display, the beeper notifies the user of wrong operations and errors.

Motorized lock

Long life, high security, low power consumption. Two bolts.

Braille keypad

Opening delay (optional)

To protect guests privacy in case of opening with master code: the operator can leave the room before the safe opening.

Mechanical override

To open the safe in case of failure. No need of reduced security drill points. Digit Plus Memory also records it into the Audit Trail.

Internal universal power socket (optional)

Recharging facility for all types of electronic devices whilst fully protected inside the safe.

Easy to use, thanks to the display and the beeper.

Ideal for business needs: the perfect size for a laptop computer, with an optional internal universal power socket to recharge the batteries of any electronic device in conditions of total security.

security for business users

000000

Master code

Allows service opening when guests forgot their user code.

Easy to use

Type in the code and the door opens automatically.

User code

4 or 6-digits code with up to one million different combinations.

Left-handed opening (optional)

For the maximum compatibility with all types of installation environments.

Low power consumption

The 4 standard AA size alkaline batteries (supplied) have a 3-year lifetime. No need of external wiring.

Digit Plus Memory.
No one can use the safe without leaving tracks.

Audit Trail of the latest 100 operations

The Audit Trail function stores the latest 100 operations performed on the safe (opening/closing with master code or user code and use of the mechanical override).

Portable printer (accessory)

The Print-out of the Audit Trail provides a detailed report for each event: date, time, type of operation, code utilised.

Dot matrix printer
